| **Assessment ID:** | DFI-SEC-1 | **Risk Rating:** | **CRITICAL (100/100)** |
| **Target Evaluated:** | test@gmail.com | **Scan Timestamp:** | 2026-11-11 16:53:06 UTC |
| **Assessment Mode:** | Mode A: Email Footprint | **Breach Matches:** | **488** |

## Verified Data Breach Intelligence (XposedOrNot Verified Index)

| Breach Entity | Year | Exposed Data Classes | Password Risk |
|---|---|---|---|
| **GolfCanada** golfcanada.ca | 2026 | Email addresses;Names;Usernames;Dates of birth;Genders;Geographic locations | Unknown |
| **Neogen** neogen.com | 2026 | Email addresses;Names;Phone numbers;Physical addresses;Employers;Job titles | Unknown |
| **GitesDeFrance** gites-de-france.com | 2026 | Email addresses;Names;Phone numbers;Physical addresses | Unknown |
| **AngelOne** angelone.in | 2023 | Email addresses;Names;Phone numbers;Physical addresses;Dates of birth;Government issued IDs;Bank account numbers | Unknown |
| **McKesson** mckesson.com | 2026 | Email addresses;Names;Phone numbers;Physical addresses;Dates of birth;Genders | Unknown |
| **LegionProxy** legionproxy.io | 2026 | Email addresses;Names;Passwords | Hardtocrack |
| **BaxterInternational** baxter.com | 2026 | Email addresses;Names;Geographic locations;Physical addresses;Nationality; | Unknown |
| **ManchesterAirportsGroup** magairports.com | 2026 | Email addresses;Names;Phone numbers;IP addresses;Vehicle registration numbers;Geographic locations;Browser user agents | Unknown |
| **Sharecare** sharecare.com | 2026 | Email addresses;Names;Phone numbers;Titles;Geographic locations;Physical addresses; | Unknown |
| **Lumenis** lumenis.com | 2026 | Email addresses;Names;Physical addresses;Phone numbers;Geographic locations;Dates of birth; | Unknown |
| **Carhartt** carhartt.com | 2026 | Email addresses;Names;Phone numbers;Physical addresses;Dates of birth; | Unknown |
| **Questel** questel.com | 2026 | Email addresses;Physical addresses;Dates of birth;Phone numbers; | Unknown |

## Prioritized Security Recommendations

| Priority | Security Objective & Action Steps |
| --- | --- |
| CRITICAL | **Reset Passwords for All Breached Services** (Authentication)<br>Your email address was identified in known public data breaches. Exposed credentials allow automated credential stuffing attacks.<br><br>**Implementation Steps:**<br>• 1. Identify each breached service listed in your scan results.<br>• 2. Navigate to each service website directly (never click password reset links in emails).<br>• 3. Change the account password to a completely unique, 16+ character password.<br>• 4. If you used that same password on any other service, change those immediately as well. |
| HIGH | **Remove Personal Data from Data Broker Directories** (Identity)<br>Data aggregators compile public records, consumer purchases, and breach dumps into searchable personal background dossiers.<br><br>**Implementation Steps:**<br>• 1. Search your name and phone number on Google inside quotes (e.g., "Firstname Lastname" "City").<br>• 2. Submit opt-out removal requests to major data aggregators (Radaris, Whitepages, Spokeo, FastPeopleSearch).<br>• 3. Consider automated removal tools (DeleteMe, Incogni) if manual opt-outs are too time-consuming.<br>• 4. Set up a Google Alert for your full name and primary email address. |
| MEDIUM | **Implement Email Masking and Aliases** (Identity)<br>Using a single personal email everywhere links all your online activities into a unified target for breaches and spammers.<br><br>**Implementation Steps:**<br>• 1. Use an email masking service like SimpleLogin, Addy.io, or Apple Hide My Email.<br>• 2. Generate a unique email alias for each newsletter, e-commerce store, and secondary site.<br>• 3. If an alias appears in a spam blast or breach, simply disable that alias without changing your real email.<br>• 4. Reserve your primary clean email exclusively for banking, government, and close personal contacts. |
| CRITICAL | **Activate App-Based Two-Factor Authentication (2FA)** (Authentication)<br>Passwords alone are vulnerable to breaches, phishing, and malware. 2FA stops 99% of automated account takeover attempts.<br><br>**Implementation Steps:**<br>• 1. Download an open-source authenticator app like Aegis Authenticator (Android) or 2FAS / Ente Auth (iOS/Android).<br>• 2. Go into account Security Settings for your primary email, banking, and social profiles.<br>• 3. Select 'Two-Factor Authentication' and scan the QR code using your authenticator app.<br>• 4. Securely download and store your single-use recovery / backup codes in your encrypted vault. |

| | |
|---|---|
| HIGH | **Adopt a Dedicated Password Manager** (Authentication)<br>Human memory cannot securely maintain unique, high-entropy 16+ character passwords across dozens of modern online services.<br><br>**Implementation Steps:**<br>• 1. Select an audited, open-source or end-to-end encrypted password manager (e.g. Bitwarden, 1Password, KeePassXC).<br>• 2. Create a strong, memorable Master Passphrase (e.g., 4 or 5 random words joined by spaces or hyphens).<br>• 3. Migrate existing browser-saved passwords into the encrypted vault.<br>• 4. Enable browser and mobile auto-fill to protect against phishing lookalike domains. |
